***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 and 46-55, drawn to a method and system for network communicating using encapsulation protocols, classified in class 713, subclass 150.
- II. Claims 11-12 and 56-58, drawn to a method and system for establishing another connection based upon failure of a connection, classified in class 709, subclass 239.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. In the instant case, invention I has separate utility such as in the system lacking the method for providing a reliable connection based upon failure of a connection. See MPEP § 806.05(d).

3. These inventions are distinct for the reasons given above and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for the two inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

- (a) the Group I search (claims 1-10 and 46-55) would require use of search **class**

Art Unit: 2154

**713, subclass 150** (not require for the invention II).

(b) the Group II search (claims 11-12 and 56-58) would require use of search

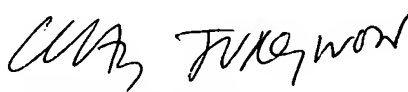

**class 709, subclass 239** (not require for the invention I).
